

Take Control of Your Utility Expenses

Balancing Costs and Operations with Expert Precision

Are your utility expenses over budget? Is energy being wasted in your facility? Don't accept annual cost increases and rising emissions as inevitable. Let us take a closer look.

Utility Budgets & Expenses

- *Making utility budgets can be daunting and they don't follow inflation.*
- *Explaining why actual monthly expenses are over or under budget can be confusing.*
- *Are you being billed correctly by the utility company?*

Operational Efficiency & Innovations

- *Are your buildings running as efficiently as possible?*
- *New HVAC and lighting technologies could save you money compared to like-for-like replacements.*
- *Energy storage may help you avoid outages in your facility.*

Capital Planning & Project Funding

- *Use other people's money to pay for your facility upgrades.*
- *Offset your monthly payments with utility savings.*
- *Cash-flow positive from day one!*
- *Utility rebates could pay for your entire upgrade.*

Strategic Energy Procurement

- *You may not have to buy electricity or natural gas from the local utility.*
- *The local utility is not always the cheapest option.*
- *No infrastructure changes at your facility.*
- *Renewable electricity could be the cheapest option.*

We simplify utilities to save companies money—helping them use less energy and pay less for it
